Thanks, Mat. I am glad you had the chance to offer improvements.

If not too late, I have a few additional suggestions:

- 1) I would adjust the purpose to refer to “currently planned” next steps and also add the notion of soliciting feedback/input on the approach.
- 2) I assume Chris and Michelle are familiar with the more informal terminology, but I would still suggest inserting “also known as blue baby syndrome” in parens where the paper describes health effects.

3) **Ex. 5 Deliberative Process (DP)**

Dan,

Attached is my mark-up of Tony’s briefing for the RA. He sent a draft yesterday, and solicited input. All the mark-ups should be visible. I offered in our discussions that I thought that in an executive briefing we ought to be unambiguous about the outcome we’re pursuing.

Also, worth noting: The only thing Tony
